

ROMNEY SHEEP ALLIANCE

WHERE EVERY SHEPHERD MATTERS.

Romney Registration Form

RSA members in good standing may use this form to register their purebred Romney sheep.

How To Register Your Sheep:

Your Romney sheep may be registered with the RSA using this form or the online form found at romneysheep.net.

1. "Sheep ID" is the ear tag number your animal will be recorded with.
We recommend this be a scrapie tag or flock ID.
2. "Sheep Name" is whatever you want to name your sheep's name. It is not required to name your sheep.
3. "Color" is the most accurate description of the color of your sheep.
4. "Birthdate" is the date of birth of the animal being registered.
5. "Nat/AI/ET" refers to the way the animal being registered was conceived.
6. Birth type is the number of lambs in the litter.
 - a. SG = Single TW = Twin TR = Triplet
7. "Sire RSA #" is the sire's RSA registration number. This information can be found on the top left corner of the sire's registration paper.
8. "Sire ID" is the ear tag and name of the sire of the animal being recorded.
9. "Dam RSA #" is the dam's RSA registration number. This information can be found on the top left corner of the dam's registration paper.
10. "Dam ID" is the ear tag and name of the dam of the animal being recorded.
11. Put an "X" in the "Transfer?" box if the sheep is to be transferred to a new owner at the time of registration.

These are legal documents. They must be truthfully completed and signed appropriately.

A completed "Registration Work Order Form" must accompany this form.

Color Explanations:

Romney sheep come in a wide variety of colors. Below is a brief guide to what color your animal is for registration purposes.

Use (*W, NCS, NCP, MS, MP*) in the color column when you fill out this form.

W = White

NCS = Natural Color Solid - solid colored lambs with no variegation or white

NCP = Natural Color Pattern - these lambs are born black with varying amounts of white or silvery markings on their face, legs, and saddle. If there is any white at all, even just a bit on the face or ears, use this designation.

MS = Moorit Solid - solid colored lambs with no variegation or white

MP = Moorit Pattern - these lambs are born brown with varying amounts of white or silvery markings on their face, legs, and saddle. If there is any white at all, even just a bit on the face or ears, use this designation.

Moorits have brown wool, hair skin, lips, skin around eyes, and tongue. The brown tips that occur on a black sheep are not moorit.

All applications for lambs sired by a ram NOT owned by the owner of the dam at the time of lambing must be accompanied by RSA's **Certificate of Breeding** as part of required documentation when registering sheep under the following circumstances:

- a) when applicant is not the breeder of offspring being registered, or the owner of the sire per RSA's records
- b) when bred ewes (dams) are purchased, or a ram (sire) is leased/borrowed
